South Carolina Real Estate License Exam Prep Stephen Mettling, David Cusic, Ryan Mettling, 2024-09-06 Features of Performance Programs Company's South Carolina Real Estate License Exam Prep (SC-RELEP): National Principles & Law Key Point Review (60 pages) Real Estate Math Key Formula Review & Practice (20 pages) South Carolina-Specific Laws and Practices (28 pages) National Practice Tests (500 questions) South Carolina Practice Tests (125 questions) South Carolina Sample Exam (100 questions) We know the real estate licensing exam can be tough, and very nerve-wracking to prepare for. That's why we created South Carolina Real Estate License Exam Prep (SC-RELEP) the way we did. Since we have been managing real estate schools and developing curriculum for forty years, we know how all this works - or fails to work. SC-RELEP is comprehensive in that it contains both key content review and testing practice. And the text review is South Carolina-specific - not just simplistic national content, but terse, relevant and accurate South Carolina laws and regulations presented as a well-organized set of state 'key point reviews' ideal for pre-test memorization. But let's not dismiss the importance of the national content either. SC-RELEP's national key point reviews are a succinct compression of tested national principles and practices that comprise the national portion of state license exams from coast to coast. Our content is drawn from our own national textbook, Principles of Real Estate Practice - one of the most widely used principles textbooks in the country. Finally, our national content, as well as our question selection, is further tailored to the state testing outline promulgated by PSI for South Carolina. Thus the breadth and depth of the law reviews and test questions reflect the topic emphasis of your state's testing service and your South Carolina license exam. A word about the test questions... SC-RELEP's testing practice section consists of ten national practice tests, five state practice tests, and one state exam sample test. The practice tests are roughly 50 questions in length and the sample test is 100 questions. The test questions are designed to cover the content covered by the law reviews - which reinforces your learning of the total body of information tested by your state exam. The questions are direct, to the point, and designed to test your understanding. When you have completed a given test, you can check your answers against the answer key in the appendix. You may also note that each question's

answer is accompanied by a brief explanation, or “rationale” to further reinforce your understanding. In the end, as you know, it’s all up to you. Unlike other publications, we are not going to tell you that using this book will guarantee that you pass your state exam. It still takes hard work and study to pass. But we have done our best here to get you ready. Following that, the most we can do is wish you the best of success in taking and passing your South Carolina real estate exam. So good luck!! For students looking for a South Carolina prelicense textbook to complement South Carolina Real Estate License Exam Prep, we also publish Principles of Real Estate Practice in South Carolina for Unit I and South Carolina Advanced Real Estate Principles (SCAP) for Unit II.

**National Excellence** Pat O'Connell Ross,1993 This report on the educational needs of American gifted and talented students identifies indicators of an educational crisis, describes the current status of education for these students, and presents recommendations to meet the educational needs of these students. Indicators demonstrating the need for change include the relatively poor performance by American students on international tests and the small number of students performing at the highest levels on National Assessment of Educational Progress tests. Recent studies have shown that gifted and talented elementary school students have mastered 35-40% of the curriculum in five basic subjects before they begin the school year; most regular classroom teachers make few, if any, provisions for talented students; highest achieving students study less than an hour a day; and only 2 cents out of every \$100 spent on K-12 education supports special opportunities for talented students. A review describes how gifted and talented students are currently identified, the number of students served, the kind of support available, the kind of education most gifted and talented students receive, and characteristics of effective programs for these students. Seven recommendations are offered: (1) set challenging curricular standards; (2) establish high-level learning opportunities; (3) ensure access to early childhood education; (4) increase learning opportunities for disadvantaged and minority children with outstanding talents; (5) broaden the definition of gifted (a broadened definition based on the federal Javits Gifted and Talented Education Act is offered); (6) encourage appropriate teacher training and technical assistance; and (7) match world performance. (Contains 43 references.) (DB)
